LT: 1. I can describe the lasting effects of the gold rush by examining past and current mining practices.

2. I can describe how California responded to the end of the gold rush period.

**Case Study 3 Mining Model and Technical Drawing Rubric**

Criteria	Expert	Practitioner	Apprentice	Beginner
Model	Model goes above and beyond the expectations.	Model includes all necessary parts to demonstrate understanding of how the mining tool operates.	Model is missing some important and necessary parts.	Model is incomplete.
Drawing	Drawing goes above and beyond the criteria for technical drawings, and has included extra elements.	Drawing includes all 7 elements of technical drawings.	Drawing is missing attention to some of the 7 elements of technical drawings.	Drawing is incomplete.
Craftsmanship	The model and project are impeccably crafted, with high attention to detail.	The model and project are well done.	The model and project have elements of sloppiness or lacks detail in some areas.	Craftsmanship is not apparent in the model and project.
HOW's	Student demonstrated extremely strong HOW's throughout the duration of the project.	Student met the standard for HOW's for the duration of the project.	Student did not meet the standard for strong HOW's but approached the standards.	Student did not exhibit strong HOW's during the project.
