

My animal is called a
Megapode's or Spring
Hare. The prehistoric bunny
had fur and had beady
eyes and his face looked
like a rat's face. My
animal hopped like a
bunny.
kai

My animal is a woolly
rhino. Did you know
that
a woolly rhino could
break
down a tree in one
minute?
Lewis

Smilodon
Sabertooth cat
A pack of Smilodon
kill a whole Woolly
Mammoth!
He evolved into a
cheetah.
He lived 1/2 million
to 12,000 years ago.
Sarafina

Leptictidium
Delicate wasel
I think it is interesting
that it was a carnivore
because I thought it
was an herbivore. It
evolved into cats, mice,
and shrew. It lived 50-110
million years ago.

Lauren

Propalaeotherium

Prehistoric Horse.

The prehistoric horse was the size of a cat!

It evolved into modern day horses.

It lived 49 to 143 million years ago.

Merit

Basilosaurus

Primitive whales

Primitive whales 80 feet long.

They evolved into modern whales

They lived 8 million year ago

Noa Noa

Megantion

Sabertooth cat

It can jump high and get an animal.

It turned into a lion.

It lived 3 to 1 1/2 million years ago.

Julia

My animal is the Andrewsarchus. It eats big animal and large. It is as heavy as a cat. Asia and they found fossils near the FIVEET banks

that

My animal is called
Megaloceros or Irish
Elk. It is a giant deer
and it has horns, very
big. It was one of the
biggest deers in the
whole world. It ate plants.
It died out because the
deer's needed more ~~vitamin~~
for their antlers and there
wasn't enough food because
of the Ice Age
Alicia

Ursus spelaeus

cave bear

When they stood on
two feet they were
as tall as a tree.
They evolved into
bears.

They lived 300,000 to
10,000 years ago.

John

Paleoparadoxia

seacow

They grew flippers.
It evolved into
a sea lion. It lived
35 million years ago.

Jacob

Dinotheres

Dinotherium

My animal's tusks were backwards.
It evolved into elephants.
My animal lived seventeen to
one point six million years ago. Lewis

Brass

My animal is a Badger
It was a carnivore
It preyed on deer and other
animals. It has really
short teeth and it is
also called a meerkat.
And it's a bone crusher.
Nicky

Anchitherium.

3 toed horse.

It was a prehistoric
zebra.

It lived 26 million years
ago.

I think it evolved into
a zebra.

Jasmine*

Mammuths Primigenius woolly
Mammoth. Did you know a
Mammoth uses its tusks
to move snow? It evolved
into an elephant. It lived
120,000-10,000 years ago.

Alliya

Kubarochoeras gigas
Fossil pig
It was about as big
as a floor lamp and
had a big horn on
its head. It evolved
into Wildboars. It
lived 14 million years
ago.
