Ezeikel

Snakes

The most important thing about snakes is that they eat meat like pig, deer, and monkeys. They also eat lots of insects, mice, squirrels, fish, birds, and eggs.

Michael

Snakes

The most important thing about snakes is that they are reptiles. Snakes live in sunny places and love the water.

JASON

Kangaroos

The most important thing about kangaroos is that they have tails that help them balance. They have large ears.

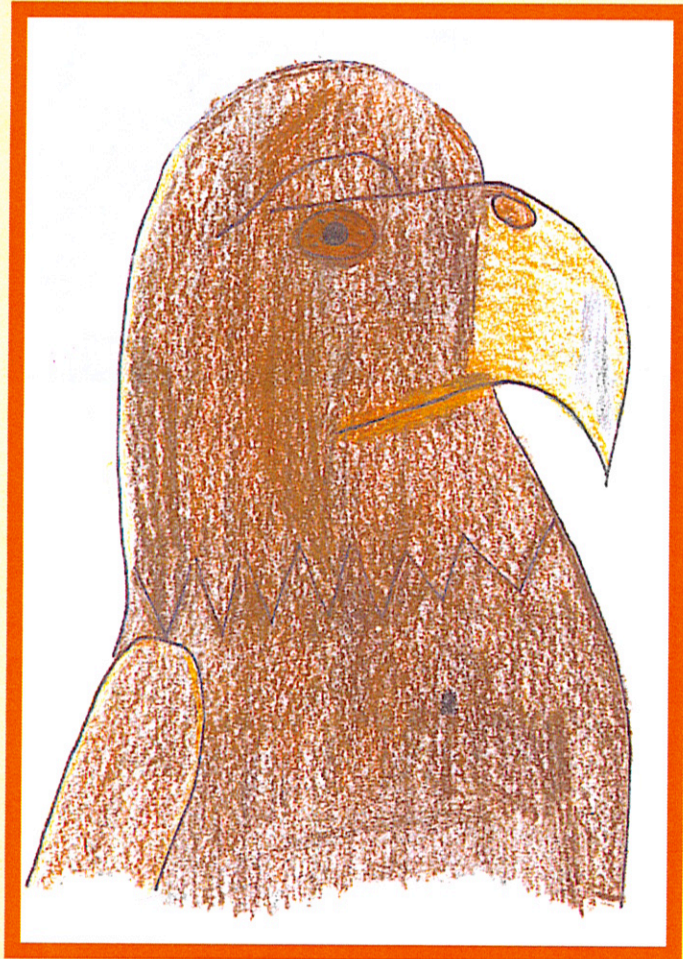

Adamaris

Kangaroos

The most important thing about kangaroos is that they sometimes fight because one kangaroo wants to be the boss of the mob.

Taylor

Eagles

The most important thing about eagles is that they make enormous nests up to 8 feet across and it weighs up to 2,000 pounds.

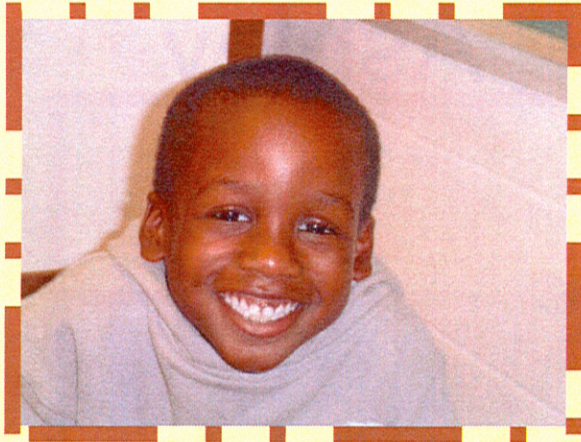

Ashley

Eagles

The most important thing about the eagle is that it is the symbol of the United States of America.

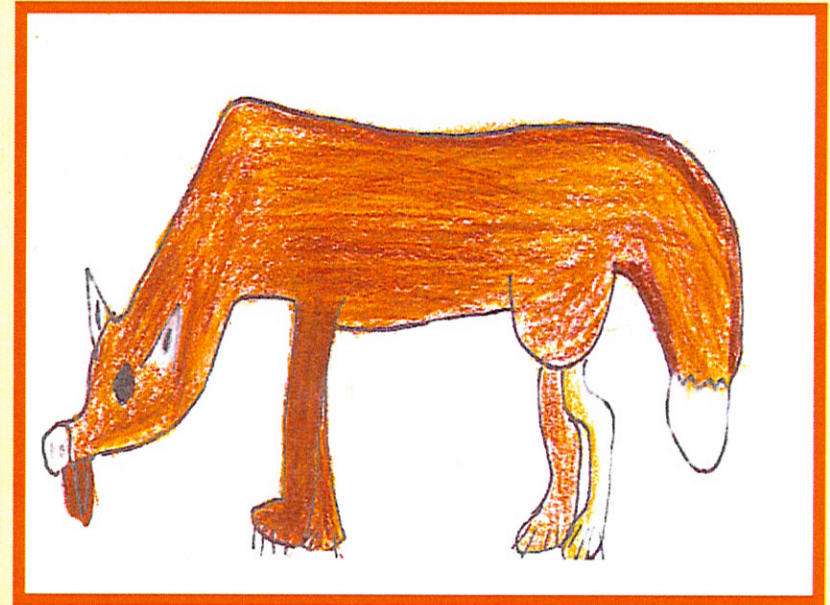

Fox

The important thing about foxes is that they live in North America, South America, and Europe. Some foxes live in dens near water.

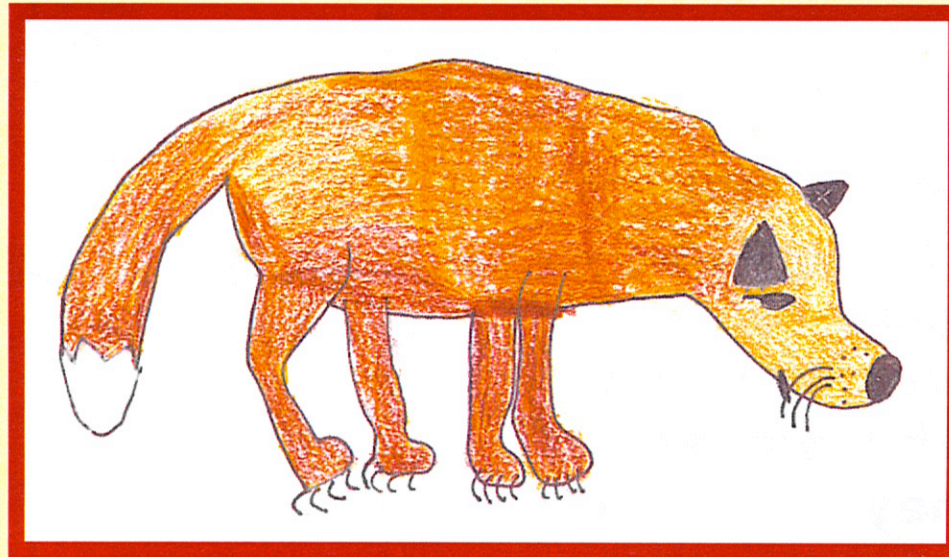

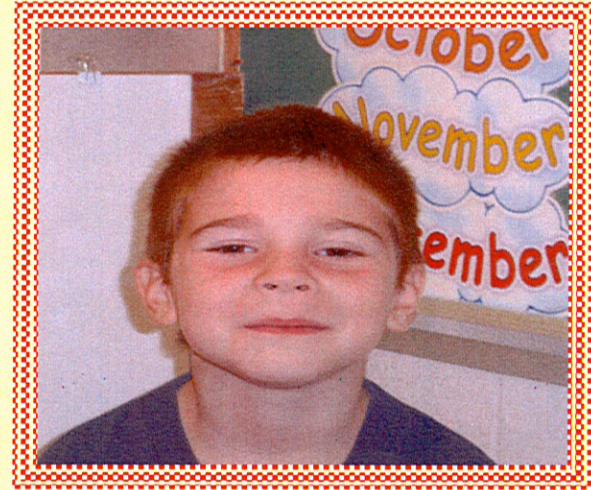

Ernie

Jared

Fox

The most important thing about foxes is that they are swift and clever. They are really fast.

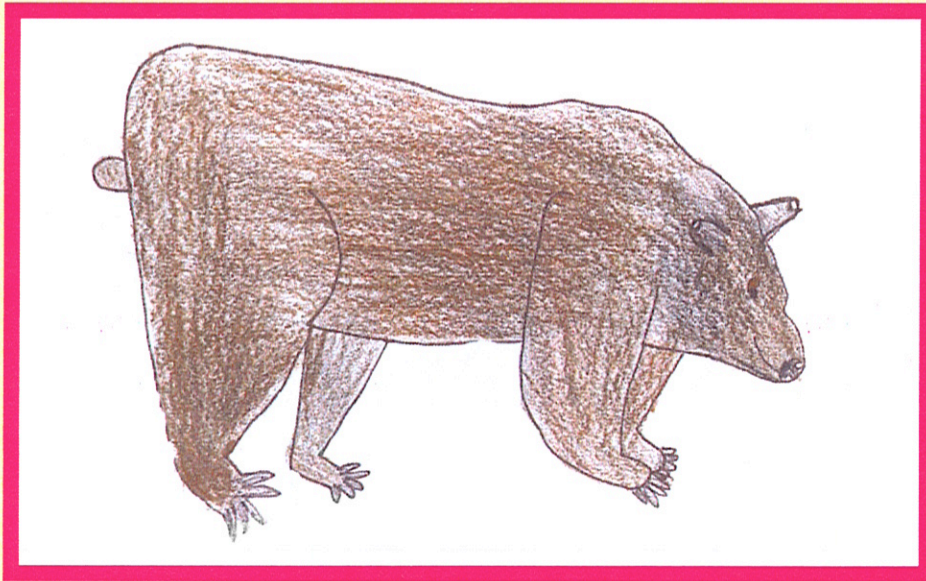

Lashay

Bears

The most important thing about bears is that they grow fat before winter. They do not eat in the winter because they hibernate.

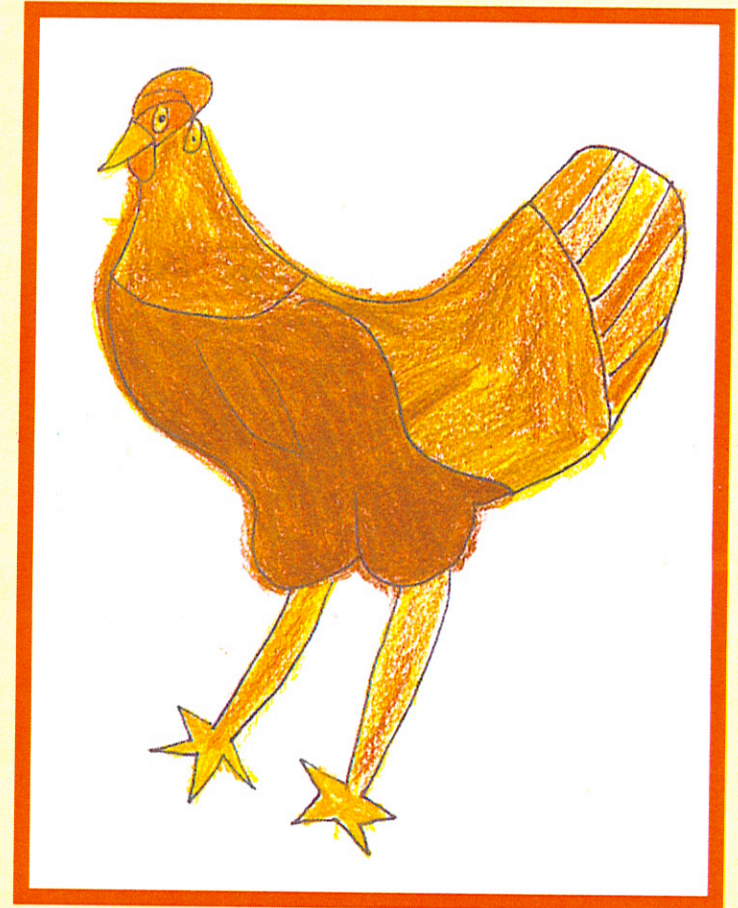

Yolanda

Bears

The most important thing about bears is that they hibernate in the winter. They climb trees to escape from danger.

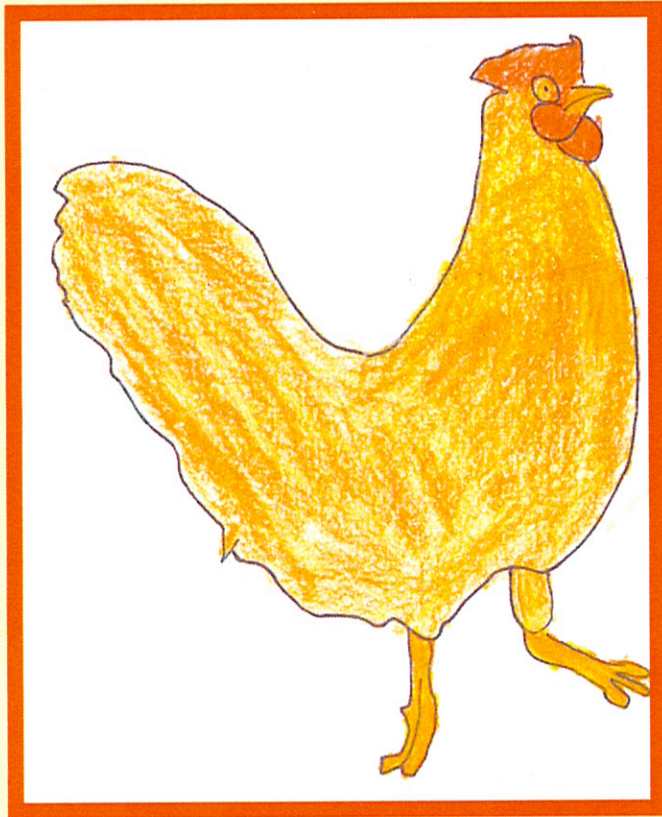

Nga

Chickens

The most important thing about chickens is that they eat insects, fruit, worms, seeds, snails, and slugs.

Ata

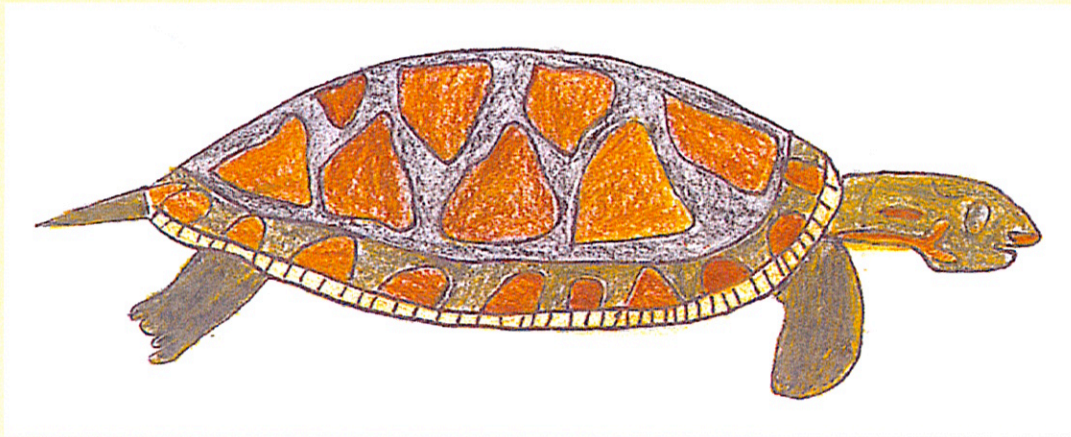

Chickens

The most important thing about chickens is that roosters can crow and they are males.

Kathy

Turtles

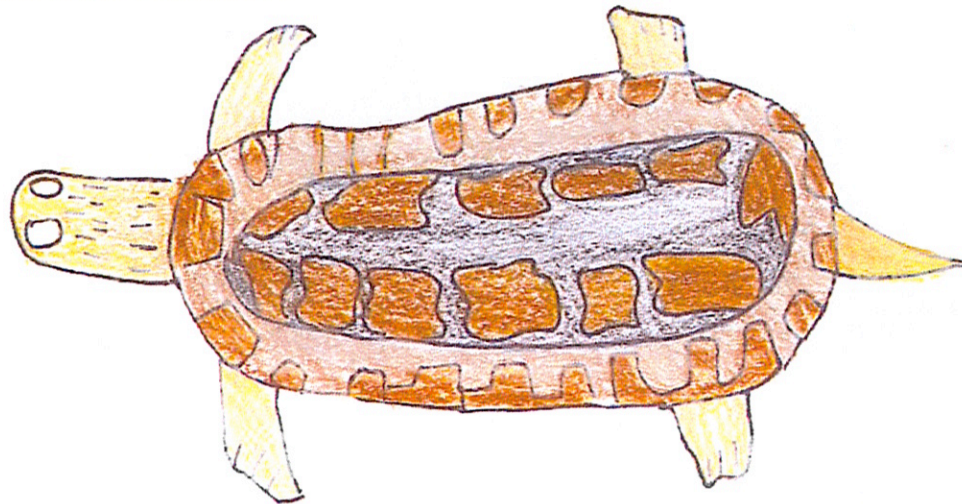

The most important thing about turtles is that they have sharp jaws but they don't have any teeth.

Breanna

Turtles

The important thing about turtles is that there are 200 special kinds of turtles.

The children in Mrs.
McCarthy's first grade class
at

Alice B. Beal Magnet School:
An Expeditionary Learning
School

in Springfield, MA

studied animals that are in
the Forest Park Zoo while
learning about the park's
resources.
